

Experimental Geosciences

For students who want to do research right from the beginning!

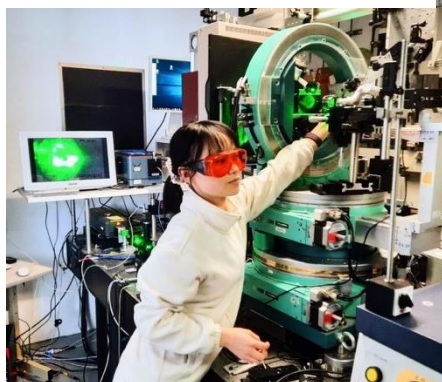

Hosted at **BGI**, a world-leading centre for **high-pressure & high-temperature research** in Earth & Planetary sciences

Working language of the Master & BGI is **English**.

The **2-year MSc** in **Experimental Geosciences** covers several fundamental scientific fields in **mineral physics, crystallography, materials science, geochemistry, cosmochemistry & geophysics**.

- **Application requirements:** **B.Sc.** with a grade better than 2.5 in the German grading system & B2 English level
- **No tuition fee.** ~160€ semester fee for student services & transportation
- **Possibility of financial support by BGI**

experimental & mineral physics labs

With a new research project each semester, you will be trained **“hands-on”** in many **experimental & analytical laboratory techniques**, preparing you for careers in academia or industry!

2 application deadlines a year:
June 15th & December 15th
