Session

T121. Mineralogical Characterization of Economic Resources: From Critical Minerals to Gemstones

Session Description

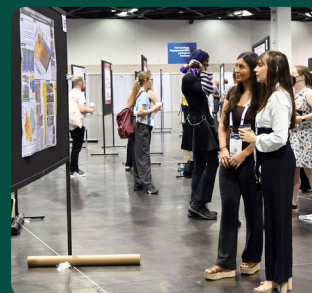

From ore materials to precious gemstones, minerals play an important role in almost every aspect of our lives. This session will focus on characterization of economic minerals employing spectroscopic techniques, geochemical analysis, and microanalytical techniques.

Session Chairs

Aaron Palke, James Shigley, Barbara Dutrow, Kenneth Befus, Christopher M. Breeding

Session Endorsers

GSA Mineralogy, Geochemistry, Petrology, and Volcanology Division;
GSA Geoinformatics and Data Science Division; Microanalysis Society
